CONTENTS OF VOLUME 36

NUMBER 1—15 JANUARY 2005

Editorial iii

Recursive approach of optimal Kalman filtering problem for multiparameter singularly perturbed systems
H. MUKAIDANI ... 1

Fixed-order controller design for linear time-invariant descriptor systems: a BMI approach
X. HUANG and B. HUANG ... 13

Delay-dependent robust guaranteed cost control of an uncertain linear system with state and input delay
J. GAO and B. HUANG ... 19

New results of robust quadratically stabilizing control for uncertain linear time-delay systems
H. SU, X. JI and J. CHU ... 27

Warehouse sizing and inventory scheduling for multiple stock-keeping products
V. V. PETINIS, C. D. TARANTILIS and C. T. KIRANOUDIS ... 39

Optimal taxation in national economies. Net income entropy, weighted incomes-inequalities and fuzzy saving propensities
G. JUMARIE ... 49

NUMBER 2—10 FEBRUARY 2005

Design of real-time periodic control systems through synchronization and fixed priorities
D. SIMON and F. BENATTAR ... 57

Fuzzy modelling control for aircraft automatic landing system
J.-G. JUANG and J.-Z. CHIO ... 77

Neurofuzzy modelling of the reflow thermal profile for surface mount assembly
T.-N. TSAI, T. YANG and P.-A. HOU ... 89

An inverse European option problem in estimating the time-dependent volatility function with statistical analysis
H.-M. CHEN and C.-H. HUANG ... 103

NUMBER 3—20 FEBRUARY 2005

Distributed optimal fusion steady-state Kalman filter for systems with coloured measurement noises
S.-L. SUN and Z.-L. DENG ... 113

Self-organizing fuzzy control of active suspension systems
R.-J. LIAN, B.-F. LIN and W.-T. SIE ... 119

The wavelet-NARMAX representation: A hybrid model structure combining polynomial models with multiresolution wavelet decompositions
S. A. BILLINGS and H. L. WEI... 137

Successive approximation approach of optimal control for nonlinear discrete-time systems
G.-Y. TANG and H.-H. WANG ... 153

Design of a discrete robust controller using a first-order model approximation
J. R. WEBBER and Y. P. GUPTA ... 163

NUMBER 4—15 MARCH 2005

A new variable structure multiple-model algorithm for manoeuvring target tracking
H. M. SUN ... 171

Centre-manifold-based sliding mode output tracking for non-minimum nonlinear systems
X. WANG, Z. CHEN and Z. YUAN ... 191

Discrete fuzzy covariance control for specified decay rate
W.-J. CHANG and C.-C. SHING ... 201

A shock model with two-type failures and optimal replacement policy
G. J. WANG and Y. L. ZHANG ... 209

Fault accommodation for nonlinear systems using fuzzy adaptive sliding control
Y. ZHANG, F. WANG, T. HESKETH, D. J. CLEMENTS and R. EATON ... 215

Iterative learning controllers for discrete-time large-scale systems to track trajectories with distinct magnitudes
X. RUAN, Z. BIEN and K.-H. PARK ... 221
Optimal supervisory control under partial observation
M.-S. LEE and J.-T. LIM ... 235

NUMBER 5—15 APRIL 2005

Valuation of expansion flexibility in flexible manufacturing system investments using sequential exchange options
E. E. KARSAK and C. O. ÖZOGUL ... 243
On solving permutation scheduling problems with ant colony optimization
D. MERKLE and M. MIDDENDORF ... 255
On a generalized *k*-out-of-*n* system and its reliability
L. CUI and M. XIE ... 267
Delay-dependent stability and stabilizability of uncertain jump bilinear stochastic systems with mode-dependent time-delays
Z.-H. GUAN, W.-H. CHEN and J. XU ... 275
Discrete-time H^{∞} filtering with initial condition
Y. K. FOO ... 287
Robust decentralized fast-output sampling technique based power system stabilizer for a multi-machine power system
R. GUPTA, B. BANDOPADHYAY and A. M. KULKARNI ... 297

NUMBER 6—15 MAY 2005

Modelling and asset allocation for financial markets based on a stochastic volatility microstructure model
H. PENG, Y. TAMURA, W. GUI and T. OZAKI ... 315
A mixed inventory model with variable lead time and random back-order rate
R. I. ZEQUEIRA, A. DURÁN and G. GUTIÉRREZ ... 329
A robust algorithm for model-following control of under-actuated systems, and its application to a non-holonomic robot and an aircraft
Y. HAN ... 341
Gain scheduling control of nonlinear singularly perturbed time-varying systems with derivative information
H.-L. CHOI and J.-T. LIM ... 357
On the design of a reduced-order H^{∞} controller for nonlinear sampled-data systems
Y.-F. LI, C.-F. YUNG and H. JUNG ... 365
On the existence of duality gaps for mixed integer programming
Y. TANAKA ... 375

NUMBER 7—10 JUNE 2005

Forecasting warranty performance in the presence of the 'maturing data' phenomenon
B. RAI and N. SINGH ... 381
Quadratic stabilization of switched systems
Z. JI, L. WANG and G. XIE ... 395
Optimal controller and filter realizations using finite-precision, floating-point arithmetic
J. F. WHIDBORNE, D.-W. GU, J. WU and S. CHEN ... 405
Influence of self- and cross-diffusion on wave train solutions of reaction-diffusion systems
B. MUKHOPADHYAY and R. BHATTACHARYYA ... 415
The optimal used period of repairable product with leadtime after the warranty expiry
J.-P. JHANG ... 423
Robust sliding mode controllers design techniques for stabilization of multivariable time-delay systems with parameter perturbations and external disturbances
E. M. JAFAROV ... 433

NUMBER 8—20 JUNE 2005

Delay-dependent and delay-independent energy-to-peak model approximation for systems with time-varying delay
Q. WANG, J. LAM, S. XU and H. GAO ... 445
Global stabilization of a class of time-delay nonlinear systems
X. ZHANG and Z. CHENG ... 461
A new delay-dependent stability criterion for linear neutral systems with norm-bounded uncertainties in all system matrices
Q.-L. HAN ... 469
On the solution of the tracking problem for non-linear systems with MPC
L. MAGNI and R. SCATTOLINI ... 477
An infinite ϵ-bound stability criterion for a class of multiparameter singularly perturbed time-delay systems
J.-S. CHIOU and C.-J. WANG ... 485
A new fast cellular automata orthogonal least-squares identification method
S. A. BILLINGS and S. S. MEI ... 491
On the stability of price-adjusting oligopolies with incomplete information
C. CHIARELLA and F. SZIDAROVSZKY ... 501

NUMBER 9—15 JULY 2005

Special Issue: Robots and Sensors for Landmine Detection

Editorial: Robots and sensors for landmine detection
C. KAMBHAMPATI and S. RAJASEKHARAN ... 509
Canadian teleoperated landmine detection systems. Part I: The improved landmine detection project
A. A. FAUST, R. H. CHESNEY, Y. DAS, J. E. MCFEE and K. L. RUSSELL ... 511
Canadian teleoperated landmine detection systems. Part II: Antipersonnel landmine detection
A. A. FAUST, R. H. CHESNEY, Y. DAS, J. E. MCFEE and K. L. RUSSELL ... 529
DYLEMA: Using walking robots for landmine detection and location
P. G. DE SANTOS, E. GARCIA, J. ESTREMERA and M. A. ARMADA ... 545
Modelling uneven terrain for geo-location of mines detected via vehicular mounted sensors
S. KANSAL, G. COOK, C. AMAZEEN and K. SHERBONDY ... 559
Strength of landmine signatures under different soil conditions: implications for sensor fusion
R. L. VAN DAM, B. BORCHERS and J. M. H. HENDRICKX ... 573
Thermal detection of buried landmines by local heating
M. BALSI and M. CORCIONE ... 589

NUMBER 10—15 AUGUST 2005

Optimal recursive estimation for discrete-time descriptor systems
J. Y. ISHIHARA, M. H. TERRA and J. C. T. CAMPOS ... 605
New recursive estimators from correlated interrupted observations using covariance information
S. NAKAMORI, R. CABALLERO-ÁGUILA, A. HERMOSO-CARAZO and J. LINARES-PÉREZ ... 617
Determining optimal warranty periods from the seller's perspective and optimal out-of-warranty replacement age from the buyer's perspective
Y.-H. CHIEN ... 631
Design of an analytic constrained predictive controller using neural networks
T. J. J. VAN DEN BOOM, M. A. BOTTO and P. HOEKSTRA ... 639
Equilibrium stability in decentralized design systems
V. CHANRON, T. SINGH and K. LEWIS ... 651
Existence of solutions to MIMO relay feedback systems
C. LIN, Q.-G. WANG and T. H. LEE ... 663

NUMBER 11—15 SEPTEMBER 2005

Special Issue: Reliability

Guest Editorial
H. PHAM ... 669

Evaluation of software availability for the imperfect software debugging model
C. H. LEE, S. M. LEE and D. H. PARK ... 671

Analysis and design of reliable control systems for urban traffic networks
Z. CHEN and T. CHANG ... 679

Modelling accelerated life testing based on mean residual life
W. ZHAO and E. A. ELSAYED ... 689

A study of the optimal use period and number of minimal repairs of a repairable product after the warranty expires
J. P. JHANG ... 697

Comparing software fault predictions of pure and zero-inflated Poisson regression models
T. M. KHOSHGOFTAAR, K. GAO and R. M. SZABO ... 705

Cost evaluation for an imperfect-repair model with random repair time
J.-H. LIM, D.-K. KIM and D. H. PARK ... 717

NUMBER 12—10 OCTOBER 2005

Dissolved oxygen control for activated sludge processes
W. CHOTKOWSKI, M. A. BRDYS and K. KONARCZAK ... 727

Nonlinear channel equalizer design using directional evolutionary multi-objective optimization
N. ZONG and X. HONG ... 737

Minimising mean tardiness with alternative operations in two-machine flow-shop scheduling
J.-S. CHEN and J. C.-H. PAN ... 757

Solutions of time-varying TS-fuzzy-model-based dynamic equations using a shifted Chebyshev series approach
W.-H. HO and J.-H. CHOU ... 767

Detection and spy sensors in discrete distributed systems
L. AFIFI, A. EL JAI and M. MERRY ... 777

NUMBER 13—20 OCTOBER 2005

The optimal robust control policy for uncertain semi-Markov control processes
T. HAO, X. HONGSHENG and Y. BAOQUN ... 791

Buyer's optimal ordering policy and payment policy under supplier credit
Y.-F. HUANG 801

Impulsive control of Lur'e systems
J. T. SUN 809

Approximate solutions for the Maximum Benefit Chinese Postman Problem
W. L. PEARN and W. C. CHIU ... 815

Generalized spare ordering policies with allowable inventory time
Y.-H. CHIEN 823

Design and analysis of an efficient neural network model for solving nonlinear optimization problems
I. N. DA SILVA, W. C. DO AMARAL and L. V. DE ARRUDA ... 833

A simple method for identification of singleton fuzzy models
C.-L. CHEN, S.-H. HSU, C.-T. HSIEH and T.-C. WANG ... 845

NUMBER 14—15 NOVEMBER 2005

Special Issue: Contemporary Intelligent Systems

Methodologies and applications in contemporary intelligent systems
V. S. JOTSOV, M. B. HADJISKI and V. S. SGUREV ... 855

Intuitionistic fuzzy interpretations of multi-criteria multi-person and multi-measurement tool decision making
K. ATANASSOV, G. PASI and R. YAGER ... 859

Entropy for fuzzy regression analysis
C. KAO and P.-H. LIN ... 869
Gene sequence data sets analysed using a hierarchical neural clusterer
R. ADAMS, N. DAVEY, P. KAYE and W. PENSUWON ... 877
Efficient episode encoding for spatial navigation
E. BARAKOVA and T. LOURENS ... 887
Ranking of admissible alternatives in interval decision making
V. BOEVA, B. DE BAETS and E. TSIPORKOVA ... 897
Inducer: a public domain workbench for data mining
M. BRAMER ... 909
Decision making soft computing agents
D. V. LAKOV and M. V. VASSILEVA ... 921
Analysis of linear and nonlinear dimensionality reduction methods for gender classification of face images
S. BUCHALA, N. DAVEY, T. M. GALE and R. J. FRANK ... 931

NUMBER 15—15 DECEMBER 2005

Stability estimation of PFM-type pulsed neural networks
T. TODO, T. MORI and Y. KUROE ... 943
Ant search based control optimisation strategy for a class of chaotic system
D. WANG and W. H. IP ... 951
Robust stability conditions for polytopic systems
Ľ. GRMAN, D. ROSINOVÁ, V. VESELÝ and A. KOZÁKOVÁ ... 961
The estimation of the order of an ARMA process using third-order statistics
A. AL-SMADI ... 975
On nonlinear H^{∞} sliding mode control for a class of nonlinear cascade systems
J.-X. XU, Y.-J. PAN, T. H. LEE and L. FRIDMAN ... 983
Robust mixed H_2/H_{∞} filtering for discrete-time delay fuzzy systems
Y.-C. LIN and J.-C. LO ... 993
